

A person wearing a dark jacket and a beanie is sitting on an orange metal bench, looking towards a large Ferris wheel in the background. The Ferris wheel is white with many passenger cars. The scene is outdoors, possibly at a park or fairground, with some trees and a body of water visible in the distance.

WHAT'S POSSIBLE

SECURITY
Services and Solutions

INTRODUCTION

Integration Partners offers an independent security approach by approaching each engagement objectively and consultatively all with the goal of ensuring your security posture can Detect, Defend and Recover from Cyber Attacks.

EVERYDAY, SECURITY BREACHES AND CYBER ATTACKS COST ORGANIZATIONS BILLIONS IN LOST REVENUE AND PRODUCTIVITY AND THE RECOVERY COSTS INCREASE WITH EVERY BREACH. HACKERS DEVELOP NEW TECHNIQUES THAT CONSTANTLY CHALLENGE TODAY'S DEFENSE MECHANISMS AND IT IS IMPERATIVE THAT YOUR ORGANIZATION IS IN A POSITIVE POSITION TO DETECT AND DEFEND AGAINST THESE ONGOING ATTACKS. TO ADD TO THESE CHALLENGES, IT TEAMS FACE INTENSE PRESSURE TO ADDRESS THESE THREATS WHILE ALSO MEETING COMPLIANCE AND BUDGET REQUIREMENTS. TAKING ON THE CHALLENGE TO ENSURE SECURITY AND PROTECT INFORMATION REQUIRES INVESTMENTS IN ADVANCED TECHNOLOGIES. IT MUST ALSO ALLOCATE MULTIPLE RESOURCES TO MANAGE SEVERAL CRITICAL TASKS.

» Customer Challenges

- With today's cyber criminals constantly changing their targets and approaches, it is imperative that organizations deploy a multi-level security framework to detect, defend and recover from cyber threats.
- To mitigate these threats, many organizations have deployed multiple technologies all with the drive of achieving these goals. Unfortunately, over time, these multiple separate and different technologies and solutions have led to a fractured approach and result. This leads to lost opportunities to stop nefarious traffic quickly, efficiently and in an automated way. The cyber criminals know this and will continue to take full advantage knowing it takes months for these threats to be identified and removed.
- Consequently, the attackers will continue to hack into organizations with multiple goals in mind: data exfiltration, ransomware, or using compromised systems to launch attacks on the intended targets.

» How are we Different

- As an engineer focused organization, we continually help our customers identify areas of improvement with their security posture by transforming their existing reactive approach to a proactive, predictive and automated model. We have developed the skills needed to ensure our customers are in a better position to detect, defend and recover from an attack.
- We have strategic relationships with many industry leading security solution providers. Whether it's to develop a multi-level security framework, improve data visibility and control, quickly identify nefarious activity or respond to a breach, Integration Partners is your Next Generation Security Partner for operational readiness.

FOR BUSINESSES THAT HAVE QUESTIONS LIKE:

- » Can you quickly identify nefarious activity on your network even if encrypted?
- » Does your current security posture enable an automated response?
- » When was the last independent security assessment performed?
- » Need assistance with becoming compliant with NIST, PCI, ISO or other similar standards?
- » Are you having challenges managing the security events in your environment?
- » Can your security controls identify and inspect encrypted traffic?
- » Do you have an IoT strategy that includes security resiliency?

| <p><i>The goal of this phase would be to identify the existing security policies, procedures and technologies used to detect, defend and recover from a cyber-attack.</i></p> | <p><i>Once identified, Integration Partners will deploy the needed changes to the security posture in a way that lowers the time needed to identify and stop nefarious activity.</i></p> | <p><i>Constant evolving is an effective way to stay off cyber attackers and to ensure your environment can predictably detect, defend and recover from a cyber-attack.</i></p> |

SECURITY SERVICES and SOLUTIONS

- Managed Security Event Monitoring
 - 24x7 Monitoring & Remediation
 - Threat Reviews
 - End-Point Monitoring
 - Staff Augmentation
- Security Architecture & Design
 - Security Breach Incident Response
 - CISO On-Demand
 - Compliance GAP Assessments
 - Security Technology Deployment
- Threat & Vulnerability Management
 - Penetration Testing / Attack Simulations
 - Dark Web Threat Intelligence
 - Vulnerability Assessments
 - Risk Management
- Stopping Ransomware
 - Identify Threat Vectors
 - Deploy Prevention
 - Monitor Traffic
 - Identify Nefarious Activity Automatically
 - Enable Automatic Mitigation Steps
- Securing Your Cloud Environments
 - Manage Access
 - Protect Your Data
 - Gain Visibility & Control

Nearly every organization must comply with IT regulations and the ability to comply with applicable regulatory standards and to demonstrate that compliance to regulatory bodies is critical for every organization. Integration Partners has the capabilities and experience to compare your environment against a variety of standards, such as ISO/IEC 27001/27002, HIPAA, NERC CIP, FERPA, PCI DSS and many others. This enables a real-world recommendation and remediation of non-compliant issues.

Integration Partner's IT Security Practice has the tools, resources, and expertise to create a security strategy that manages today's risks and prepares you for new risks and threats as they emerge. The first step to securing your environment begins with speaking with one of our consultants.

- 1. MANAGED SECURITY EVENT MONITORING**
- 2. SECURITY ARCHITECTURE & DESIGN**
- 3. THREAT & VULNERABILITY MANAGEMENT**
- 4. STOPPING RANSOMWARE**
- 5. SECURING YOUR CLOUD ENVIRONMENTS**
